Complete the grading information on the back of this page. You will not receive any points for this project until you complete and return this evaluation to Mr. Freewalt.

**Read these instructions very carefully.**

List each of the members of your group.

Next to each name, give a score for each person out of a possible 10, with 10 being the best and 1 the worst.

A score of 10 should represent a person who was extremely helpful to the group and who put forth a great deal of effort into researching and preparing for trial. A score of 1 should represent a person who contributed very little to the group or who was actually a negative influence to the group (talking, messing around, etc.)

Be honest and give yourself and your group members the grade that is truly deserved.
